

QUARTERLY SUMMARY OF STATE AND LOCAL TAX REVENUE, APRIL-JUNE 1966

U.S. DEPARTMENT OF COMMERCE
John T. Connor, Secretary
BUREAU OF THE CENSUS
A. Ross Eckler, Director

GT-No. 6

OCTOBER 1966

Taxes collected by State and local governments in the United States totaled \$56.9 billion during the 12 months ended with June 1966. This reflects an increase of \$5.3 billion or 10.3 percent from a year earlier. State taxes amounted to \$29.7 billion, or 13.9 percent more than in the 12 months ended with June 1965. The yield of locally imposed taxes rose 6.6 percent, to \$27.2 billion. Following is a summary by type of tax:

Type of tax	Amount (in millions of dollars) 12 months ended with June		Percent increase
	1966	1965	
Total.....	56,878	51,561	10.3
Property.....	24,591	23,031	6.8
Other than property.....	32,287	28,580	13.2
General sales and gross receipts.....	9,403	7,953	18.2
Motor fuel sales.....	4,658	4,334	7.5
Individual income.....	4,920	4,122	19.4
Motor vehicle and operators' licenses..	2,334	2,113	10.5
Corporation net income	2,053	1,905	7.8
All other.....	8,919	8,103	10.1

During the second quarter of calendar 1966, collections of State and local taxes amounted to \$15.8 billion. As compared with the corresponding quarter of 1965, this indicates a rise of \$1.7 billion, or 12.0 percent, with State tax revenue up 15.5 percent and local taxes up 7.7 percent. These and other quarterly amounts are reported in table 1.

The accompanying chart shows trends in State and local government tax revenue, on a quarterly basis, since 1962.

Numerous factors influence the quarterly pattern of collections for particular tax categories. For example, the timing of income tax collections is affected by filing dates early in the calendar year (but with this factor increasingly tempered by withholding provisions for personal income taxes in a growing number of States). The pattern of property tax collections

is determined by legal provisions establishing tax liability dates and allowing payments by installments. However, there is considerable diversity from State to State with regard to these characteristics of property taxation.

TRENDS IN QUARTERLY COLLECTIONS
OF STATE AND LOCAL TAXES,
TOTAL AND SELECTED TYPES:
1962 TO 1966

U.S. DEPARTMENT OF COMMERCE, Bureau of the Census

A more complete discussion of intrayear tax revenue patterns appears in the Census Bureau report Tax Revenue of State and Local Governments in Calendar 1962 (State and Local Government Special Study No. 46), issued August 1, 1963).

Trends and seasonal variations in State and local tax revenue during the period covered by table 1 have also been influenced by numerous other factors, including statutory changes in tax rates, adjustments by legislation or legal rulings in the coverage of particular taxes, and major shifts in the method or timing of collections, such as the adoption or revision of withholding or installment provisions. Such factors are likely to deserve special attention in the interpretation of significant changes in individual States' collections from particular taxes, as presented in table 3.¹

Table 2 reports local collections of property taxes for selected local areas. The table lists, in State order, each of the standard metropolitan statistical areas ("SMSA's"), as defined at the end of 1964, which had a population of 700,000 or more in 1960; the component counties of such SMSA's; and all other county-type areas that had a 1960 population of 250,000 or more. (Because New England SMSA's are not made up of entire counties, the table instead lists certain "State Economic Areas" in Massachusetts and Rhode Island, respectively.

It should be noted that the amounts shown in table 2 are not limited to locally imposed property taxes but are intended to include, where such an arrangement applies, any amounts of State-imposed property taxes collected on behalf of the State by local government offices. The State tax portion makes up a significant part (generally 10 to 20 percent) of the collections shown in table 2 for particular counties of Alabama, Arizona, Kentucky, Nebraska, and New Mexico; and typically 2 to 9 percent of amounts shown for individual counties of Colorado, Kansas, Louisiana, Maryland, Minnesota, Texas, Utah, and Washington.

CONCEPTS AND TERMINOLOGY

In this as well as other Census Bureau reports on governmental finances, the concept of "taxes" is intended to comprise all "compulsory contributions exacted by a government for public purposes, except employer and employee assessments for retirement and social insurance purposes, which are classed as insurance trust revenue." Outside the scope of this report, accordingly, are collections from the unemployment compensation "taxes" imposed by

¹More detailed figures on State tax revenue, with definitions of particular types of taxes, appear in the annual reports, State Tax Collections in 1965 and State Government Finances in 1965. State and local tax data on a fiscal year basis are reported nationally and by States in the annual report, Governmental Finances in 1964-65.

each of the State governments and the District of Columbia. Included, however, are all receipts from licenses and compulsory fees, including those which are imposed for regulatory purposes as well as those designed to provide revenue.

Tax revenue is defined to include related penalty and interest receipts, but to exclude protested amounts and refunds. The deduction from gross collections of amounts refunded is particularly significant with respect to motor fuel sales taxes ("gasoline" taxes).

The general nature of the several major kinds of taxes shown separately in this report will be suggested by their headings; explicit definitions appear in the reports cited in footnote 1. Of the State-local collections summarized here briefly under the residual heading "All other taxes," a major portion (53 percent in fiscal 1964-65) involves selective sales taxes, such as those on cigarettes, liquor, and public utilities, with the balance involving various kinds of imposts, including death and gift taxes, severance taxes, general corporation licenses, and miscellaneous other licenses.

SOURCES OF DATA, AND LIMITATIONS

The statistics in this report are based mainly upon three mail surveys, dealing respectively with State-administered taxes, locally collected property taxes, and certain locally collected nonproperty taxes. These surveys provided a basis for 96 percent of the collection amounts summarized in table 1. The remaining 4 percent (making up 8 percent of the local government total, and representing about one-sixth of sums shown for "All other taxes" but only very small percentages of other tax classes) was imputed by reference to findings of recent annual Census Bureau surveys of local government finances.

Property tax amounts shown in table 1 are estimates based upon information about a stratified sample panel of 521 counties or county-type areas, which are served altogether by approximately 6,200 local tax collecting agencies. Figures concerning quarterly collections were requested by mail from all these agencies, and reports were obtained from over 90 percent of them. Sampling variation was calculated for the property tax data thus developed from the initial sample survey, covering 1962. The sampling variation of the 12-month aggregate was determined to be less than 1 percent. That is, the chances are about 2 out of 3 that the estimated yearly total differs by less than 1 percent from the results that would have been obtained from a complete enumeration. The quarterly estimates were found subject to a sampling variability of about 1 1/2 percent.

ACKNOWLEDGMENT

Appreciation is extended to the numerous State and local officials who supplied basic data needed for the preparation of this report.

Note: Because of rounding, detail may not add to totals. Property tax amounts are estimates subject to sampling variation. Of the nonproperty tax revenue shown, about 92 percent pertains to governments directly subject to survey for this report, with the remainder imputed mainly from findings of annual surveys for fiscal 1964-65 and earlier years. See text discussion of "Sources of Data, and Limitations."

¹Revised.

Note: Differences between collections of successive periods may arise not only from trends in the volume of taxable items or transactions, but potentially also from any of numerous other factors, such as statutory changes in tax rate; changes (by either legislation or legal rulings) in the coverage of particular taxes; or major shifts in methods of tax collections or its timing, such as the adoption or revision of withholding procedures. NA Not available.

¹ Less than 0.05 percent. ² The amounts shown for the District of Columbia appear here for convenient reference in relation to corresponding data for individual State governments. However, these amounts are included as local rather than State tax revenue in table 1. ³ New tax effective July 1, 1965. ⁴ New tax effective April 1, 1966.

⁵ Gross collections; amount of refunds not available. ⁶ New tax effective August 1, 1965. ⁷ Corporation income taxes tabulated with individual income taxes; allocation not available for individual State presentation. ⁸ Data shown incorporate some adjustments of amounts previously reported.
